

“ I recommend an EXHAUSTO chimney fan solution when I run into hard-to-deal-with smoking problems! ”

The White House, Washington, DC

Tuxedo Road, Atlanta, GA

Moore's Mill Road, Atlanta, GA

EXHAUSTO has manufactured chimney fans for more than 40 years.

Only the best materials and components are used. Housing is made of cast aluminum and all other components are made in stainless steel. This assures a long product life and reliability. In addition the chimney fan is virtually maintenance free. Only periodic cleaning is required.

All product components, including the motor, are produced by

EXHAUSTO according to certified quality assurance which provides the user with products of uniform quality. We are also ISO 9001 certified.

“Many years of work and experience in the chimney sweeping industry has shown that EXHAUSTO's chimney fans always assure a perfect draft in the chimney and thereby a better utilization of the fuel.

No soot and no smoke escaping into the living room!

The chimney fan is problem-free and works year-after-year.

I can certainly recommend an EXHAUSTO Chimney Fan on the chimney.”

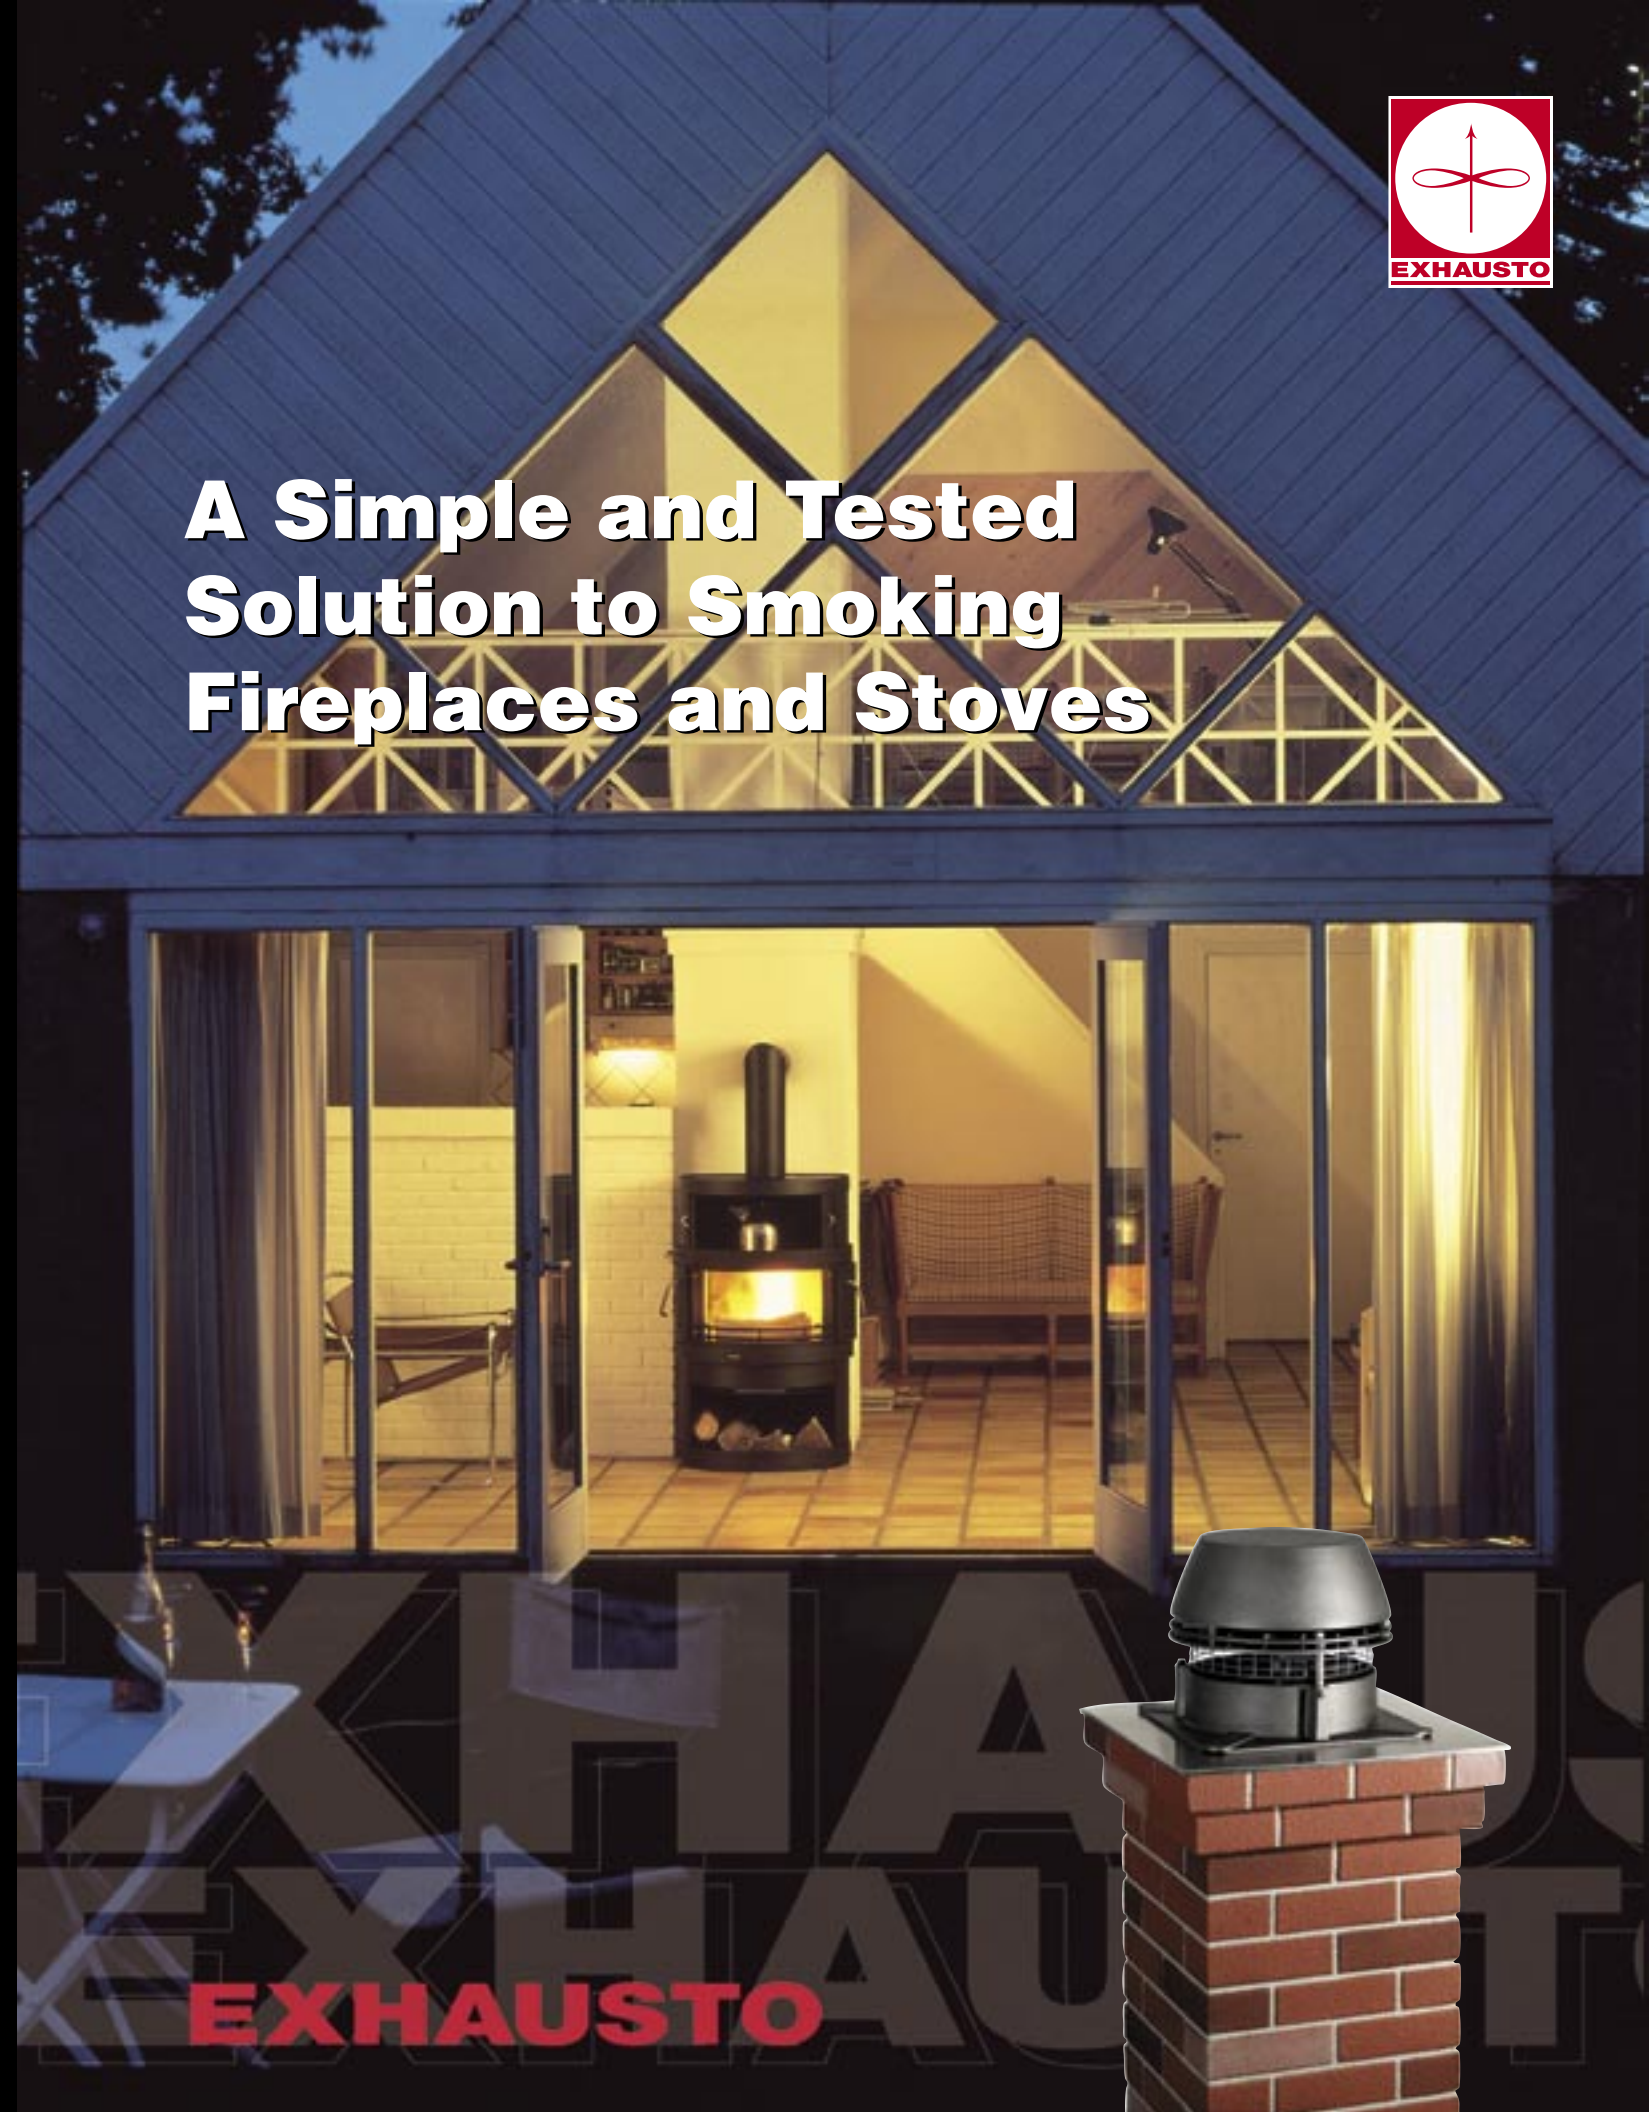

EXHAUSTO chimney fans with "built-in" comfort.

For over 40 years EXHAUSTO Chimney Fans have been protected against all mechanical problems for two full years, ten years against corrosion perforation. And unlike other fireplace cures, the EXHAUSTO Chimney Fan comes with a **SIX MONTH UNCONDITIONAL MONEY-BACK GUARANTEE.**

2-Year Warranty

EXHAUSTO

“ Nothing Is More Important than Proper Draft for the Safe and Clean Operation of Your Fireplace ”

Guaranteed Solution to Smoking Fireplaces

Easy No-Mess Installation

Quiet Operation

No More Smoke Odors in Your Home

Easy to Use

No More Discolored Ceiling and Drapes

No more Smoky, Congested, Wheezing Fireplaces...

Are your customers tired of having their homes full of smoke, soot and that annoying smell every time they light their fireplaces? Are they tired of discolored ceilings, walls and drapes? Relief is in sight!

With EXHAUSTO's extremely quiet and reliable chimney fan system, their draft problems will be cured. And it doesn't matter whether they have a wood or gas burning fireplace, a stove, an oven or a BBQ.

Easy to Install

The EXHAUSTO Chimney Fan is easy to install. There is no mess from tearing down or rebuilding.

Low Operating Cost

The EXHAUSTO Chimney Fan is very energy efficient. In most cases it consumes less energy than a regular light bulb!

Easy to Operate

Every EXHAUSTO Chimney Fan is installed with a speed control unit near the fireplace. This allows

homeowners to control the speed, so they don't pull more heat out than necessary.

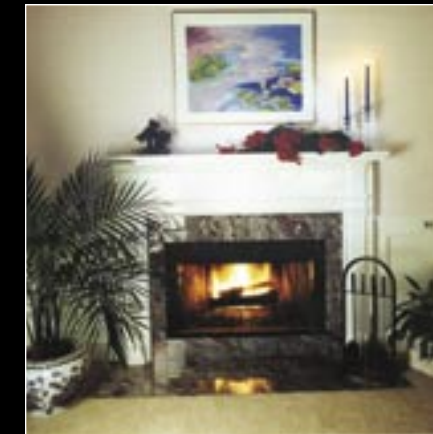

And they can use it as a ventilator even when they don't have a fire going. They just turn it on when they want to clean the room of other odors, leaving the room clean and refreshed.

Easy Maintenance

The EXHAUSTO Chimney Fan is virtually maintenance-free. All that is required is periodic cleaning - something a chimney sweep will take care of during the annual chimney inspection.

Questions Frequently Asked by Customers.

- Q.** *What happens when you have a fire in the fireplace and a power failure occurs?*
- A.** You will most likely experience the same problems you had before the chimney fan was installed.
- Q.** *The chimney has a constant down-draft and odor when not in use?*
- A.** Run the chimney fan at a low speed.
- Q.** *Does the fan always have to be on when there is a fire in the fireplace?*
- A.** Yes, the motor can only be cooled when the chimney fan is operating. It may, however, be run at a very low speed..

There's a Chimney Fan for Most Applications

The EXHAUSTO Chimney Fan can be used with wood or gas-fired fireplaces, stoves, baking ovens, BBQ's, furnaces, boilers etc.

And the chimney fans don't care whether the chimney is new or old, tall or low, thin or thick, brick or steel!

- Q.** *The fireplace spills due to negative pressure in the house. Won't the chimney fan add to the problem?*
- A.** Any exhaust fan will pull air out. However, proper use of the fan speed control assures the chimney fan simply simulates the natural draft required for the fireplace to operate. Thus the chimney fan will not exhaust more air than a well-functioning fireplace would have done.

It is important to emphasize that all furnaces, water heaters and other combustion equipment be checked for proper venting before regular use of a chimney fan.
