MIGHTY-STACK™

The Mighty-Stack, available with or without storage tank, provides an innovative solution to the short life and high energy consumption typical of direct-fired water heaters. It offers advantages in three important areas: Life cycle costs, reduced installation costs, and application flexibility.

Greater Efficiency Throughout Its Life: Not only does Mighty-Stack have an 83% thermal efficiency, it maintains a high flow design, which resists scale formation and lime build-up throughout the life of the product. Therefore, with Mighty-Stack you are assured of more reliable performance, higher efficiency and longer life.

Cost Saving Installation: Many components which are add-ons — at additional cost with other water heaters — are standard, such as factory installed combination temperature and pressure relief valve, and an integral fan to allow for either horizontal or vertical venting. The Mighty-Stack is factory pre-assembled, then operationally tested to ensure trouble-free start up with no time-wasting field adjustments required. You can count on installation cost savings as a result of the contractor-preferred design.

Application Flexibility: With Mighty-Stack you are no longer limited to replacement in-kind for cost effective installation. Mighty-Stack simplifies direct change-out from tank-type heaters. The small footprint and venting flexibility allow suitability to a wide range of applications.

Water Heater:

- 199,000 BTU/hr (58.3kW) input
- 83% thermal efficiency
- Copper tube heat exchanger
- Scale free operation
- Gasketless bronze headers
- Integral induced-draft fan
- 4" (102mm) vent (horizontal or vertical)
- Hot surface pilot ignition
- Slide out burner tray
- Pressure relief valve

- Pre-installed temperature and pressure relief valve
- Easily removable storage tank
- Coated sheet metal enclosure
- Hand-hole for cleanout

Pre-Assembled System:

- Pre-piped and pre-wired
- Single point power connection
- Fully factory tested
- Bronze-bodied circulator
- Circulator time delay relay
- Non-combustible base
- 5 year tank and 10 year heat exchanger warranty*
- All copper/bronze waterways

*See limited warranty for details

Storage Tank:

- 80 gallon (302.8 liter) glass-lined storage tank
- Aluminum sacrificial anode
- 2" (51mm) closed cell foam insulation
- Maximum working pressure 150psi
- Tank aquastat

TL00-199

Applications

- Standard 140°F (60°C) restaurant service
- 180°F (82°C) sanitary booster systems
- Food processing
- Manufacturing processes
- Hotels/motels
- Multi-unit housing
- Nursing homes/retirement facilities
- Commercial/coin laundries
